

SUNDARESAN K

DevOps Engineer

DevOps-focused Computer Science Engineering student with strong hands-on experience in Linux system administration, infrastructure monitoring, and automation scripting. Built CLI-based monitoring tools and deployment workflows. Knowledgeable in CI/CD concepts, Docker, and AWS fundamentals. Passionate about building reliable, scalable, and automated systems.

PROJECTS

Advanced Network Monitor (ANM)

- Built Linux CLI monitoring tool using Bash
- Monitors uptime, packet loss, latency, HTTP health
- Troubleshoots DNS & network issues

Linux Incident Manager

- Monitored CPU, Memory, and Disk usage using top, htop, and df
- Implemented basic auto-restart logic for failed system services
- Performed Docker container health checks and log inspection

Cloud Based Website Deployment System

- Automated deployment using shell scripts
- Reduced manual server configuration

CERTIFICATIONS

- **CCNA 1 – Introduction to Networks**
- **Git & GitHub – Version Control Practices**

TECHNICAL HIGHLIGHTS

- Strong understanding of Linux command-line operations
- Hands-on experience in server monitoring & troubleshooting
- Basic CI/CD pipeline understanding
- Containerization using Docker
- Networking fundamentals with practical debugging
- Infrastructure problem-solving mindset

EDUCATION

2022 - 2026

B.E Computer Science Engineering

P.B College of
Engineering, Chennai

SKILLS

- Operating Systems: Linux
- Version Control: Git, GitHub
- Scripting: Bash
- Networking
- DevOps: CI/CD, Jenkins
- Containers: Docker
- Cloud: AWS (EC2)
